

Don't starve together wendy

 I'm not robot  reCAPTCHA

Continue

Wendy is definitely the character I found the easiest in the game, especially at the beginning of the game. While Wendy's a bit of a depressing hang around, her sister Abigail makes killing early mobs game exceptionally easy. It can be used to provide your team with meat seemingly easy. WENDY'S STATS Hunger: 150 Sanity: 200 Health: 150 Damage Modifier: 25% Less, than the sanity modifier by default: Plum <25% less than default (under certain circumstances) and no Sanity loss from ghosts (DST) Note: Because of Wendy's character rework, which took place in March 2020, there are some stark differences between how Wendy plays in one player Do not starve and do not starve together. This guide will guide you through all the currently discovered details, however, as more changes are made this guide will continue to be updated. HOW UNLOCK WENDY Wendy is unlocked with 640 experiences in Don't Starve and is a playable character in Don't Starve Together. WENDY IS LESS LIKELY TO BECOME INSANE When you first start playing Don't Starve, chances are you're going to try to avoid becoming crazy, so playing like Wendy can be extremely rewarding. Although Wendy is not entirely dependent on darkness, she loses less sanity than other characters. Wendy will also lose less sanity when she's around mobs with madness aura. Note that Wendy's will still receive the same amount of madness from products like monster meat, humidity from rain and modifiers from objects that give madness. If you are having difficulty with sanity, choose flowers and craft Pretty Parasol and Garland as having them do so so you don't lose your sanity at night. You can also, of course, just craft yourself a Top Hat. It's all about ABIGAIL Wendy's effectively not starving version of Summoner. Wendy does most of her damage from her sister Abigail, who can be called as a ghost within 2-4 days (in one player). Players in Don't Starve Together have a bit of lead, being able to like SUMMON ABIGAIL Call Abigail, the player must place abigail's flower on the ground and kill the enemy crowd next to him. It's good to remember that you don't have to kill a particular crowd to call Abigail. I usually kill bees or spiders for early access to Abigail. The easiest way to call Abigail is to kill a butterfly. Butterflies take only one punch to kill, but if you don't get the timing down, the right butterfly will lead you on a pointless chase. Wendy's gameplay can feel relatively passive if you let Abigail do all the damage. I highly recommend helping Abigail with the damage if an army of spiders or something is swarming you. Where you swarmed, let Abigail do his thing and stand by. As soon as the enemies begin to thin, join Abigail again for some epic pounding. Given Wendy's only deals 25% less than the other characters in Don't Starve, she's not as weak as people make it to be. Honestly, you you notice it a lot, especially if you have Abigail to help you. In Don't Starve Together, it will be easier for players to call Abigail, as she now has a switchable call at all times. Players will be able to see how much health Abigail has from the meter found on HUD's right hand. If Abigail dies, she will continue to receive 1 health per second while in harmony and after renewal will have a decrease in the amount of health. Abigail's call-up to Don't Starve Together will ensure the players are 15th. HOW CRAFT ABIGAIL'S FLOWER If players lose the Abigail flower they can rework it with 1 mourning glory and 1 Nightmare Fuel. ABIGAIL IS IMPORTANT FOR FARMING RESOURCES We love things that save us time in Don't Starve, especially when it comes to saving agricultural resources. While characters like Wickerbottom are great for agricultural resources such as berries and other crops, Wendy and Abigail conquer the meat farming department. I highly recommend making yourself a Spider farm near your base. Walking on the cobwebs with Abigail was aroused and began to smack. It doesn't matter if you have an axe or a spear, Abigail can handle these little guys for you. Just make sure you track Abigail's health, because once she dies, it will take you 2-4 days to call her again. Abigail also makes farm bees and hives a breeze. Smack the hive you want to break down and watch Abigail take the agro away from you and kill the bees. The impressive AOE Abigail won't leave the bees behind, allowing you access to a large amount of sting (used for Booster Shots) and honey for Crock Pot healing recipes. If you play Wendy's and you don't have bee boxes set up or Flower Farm something is wrong! Abigail is faster than rabbits, so it will also be a great way to farm pieces of meat early in the game, although if you have a croc pot, it may not be necessary. Note: Abigail can kill crabs and jellyfish in a shipwreck. ABIGAIL HAS NO CHILL Abigail can be a little difficult to control as it tends to attack enemy mobs that are in the area. While Abigail's behavior is usually not a problem, it can be when she brings a treasure trove of spiders home. Always try to keep an eye on Abigail to make sure she doesn't bring strangers home; You'll thank me later! Note: Don't starve together implemented the use of toggling Abigail Flower, which allows you to call back Abigail, causing her to chill for a short time. If Abigail stays close to enemy mobs and doesn't navigate to safety, she will continue to damage said monsters until they (or she) are/dead. Abigail may alternately be riled up, so players don't have to agro enemy mobs, however, players should still be careful as Abigail has less health and deals less harm than it used in Don't Starve HOW ABIGAIL'S DAMAGE WORKS Abigail is stronger as the days darken, making it stronger in winter, or in shipwreck (SW), during hurricane season. Reason Cause is stronger in winter because of the damage buff effect it comes with twilight. Wendy's players must use this season to grind spiders and other small mobs that require damage to AOE. To get the maximum Abigail effect at all times, make sure you do most of your fighting at dusk and right before bedtime and you'll see a pretty consistent 40-damage per kick. Day and night mechanics are a bit confusing when it comes to caves, so be careful if you rely on Abigail to deal with it as much damage as possible. Note that only one player's Don't Starve Games have day and night cycles in the caves, and if you play Don't Starve Together (DST), caves always experience the night. Ruins will always be part of the night cycle. Abigail inflicts ten injuries during the day, 20 damages at dusk and 40 damages at night. ABIGAIL MAKES ENEMIES VULNERABLE (NOT STARVE TOGETHER REWORK) Wendy is one of the first reworks I really get to watch Clay play around with and it seems like she's been going through a number of changes these past few days. The newest addition to her sister Abigail is that the enemies she's up against are getting ghostly petals or marker, which indicates that she can take the increased damage from Wendy and allied players. This is the first character to be able to weaken enemy mobs, so use this to your advantage while fighting seasonal bosses in Don't Starve Together. Adding to make enemies more vulnerable once marked Abigail is great, especially when you pair Wendy with characters like Winona who cataputs can effectively kill all enemies quickly if marked by Abigail. The best part of labeling Abigail adds to enemies is the fact that bonus damage also applies to Wendy, meaning that she will have to deal with more than 75% damage marked by enemies! It appears that Abigail's attacks mark enemies within 2 seconds and force them to take 10% more damage from all sources. Wendy herself does 40% more damage, actually causing 1.115% damage. If you thought Wendy was weak before, you might be glad to see that you're wrong now! REMEMBER ABIGAIL NOT OVERPOWERED Although Abigail will be very useful at the beginning of the game, Abigail starts to fall when you are fighting enemies with high HP or heavy damage. Don't expect Abigail to help much once the Giants come out in Don't Starve (DST and RoG) and don't use Abigail to try to help you kill Beefalo. Chances are you'll just let Abigail die in Beefalo, so make sure you focus on the big crowds, so the abigail ends up helping you over the contrary. Remember that Abigail can't kite, and dead DPS is not DPS. If Abigail is very low on health, consider taking her away from the battle or give her some Healing Salves, Honey Poultice or form of healing. Wendy also has her own craftables in Don't Starve Together, which will be covering soon. In Don't Starve Together, Together, only has 150 health after being first called up, however, if the players keep Abigail alive at least one day she will get the spirit level, ultimately giving Abigail 300 health care. If Abigail survives for 2 days she will get a different level of spirit, becoming an additional 600 health. After her death Abigail rebooted into her prime condition, however, she would upgrade herself even if not aroused. Abigail's flower will show the different states that it is in blooming. After Abigail's death, in Don't Starve Together, Wendy's players will lose some Sanity SISTURN (NOT STARVE TOGETHER) Wendy's players now have access to an exclusive structure called Sisturn. Sisturn can be manufactured using 3 Cut Stone, 3 boards and 1 ash. Players can use Sisturn to speed up the speed at which Abigail powers up. After placing 4 flower petals in Sisturn, Sisturn will begin to rotate, effectively reducing Abigail's power timer to half a day. I would recommend having Sisturn on all your grounds if you plan on being Wendy's chief Being able to summon Abigail as you please, and the power of her quicky is the best shake-up with Wendy's recycling. Sisturn will also provide players with 25 Sanity per minute, making it a very ideal way to make sure all the players on your server are as sane as they can be. ECTOHERBOLOGY TAB (NOT STARVE TOGETHER) Wendy's players now have access to the tab exclusively for craft food for Abigail. Each item will give Abigail the status effect these include: REVENANT RESTORATIVE Crafted using 1 Spider Gland and 1 Mourning Glory, will provide Abigail with an additional 1 health per second for 1 days. Abigail will be treated for a total of 2 health per second during this period instead of her regular 1 health per second. Because of its extremely low cost, I would recommend trying to make sure that Abigail always has a restorative Revenant active. Players will always get more health using Revenant Restorative than using Spider Glands themselves. SPECTRAL CURE-ALL Created using 1 Telltale Heart and 4 Mourning Glory, will provide Abigail with 20 health per second for 30 seconds rather than her regular 1 health per second. Use Spectral Cure-All after battles or emergencies, however, 15 seconds is not enough to keep Abigail forever. UNYIELDING DRAUGHT, created using 1 magazines and 2 mourning glory, will provide Abigail shield. The unwavering checker protects Abigail for a short time and it will not take any damage from enemies, however, if against several enemies that are on different strike cycles, chances are your sister Abigail is going to take a hit or two. The unwavering checker is great against hordes of mobs such as spiders, especially because their attacks tend to synchronize that Shield Unwavering Checkers is an additional powerful one. Below is information about Unyielding Draught from Scott Hansen, developer Klei When Abigail deals damage, she will put a shield to block all incoming attacks for a short period of period Similar to how the Tulacite crown works. The use of the Unwavering Draft will double the duration of the shield, while Distilled Revenge will double the duration and damage everything that gets into the shield. - Scott Hansen (Klei Developer) Unwavering Checker lasts 1 day. DISTILLED VENGEANCE Created using 1 Living Log and 4 Mourning Glory, will increase the amount of damage to Abigail's transactions. The amount of damage will depend on how many mobs Abigail is up against. The distilled Vengance effect lasts 1 day. NIGHTSHADE NOSTRUM Created using 1 Stinger and 3 Mourning Glory, Nightshade Nostrum allows Abigail to cause damage to night time during the daytime and dusk, meaning that players don't have to rely on the time of day to cause the most damage. To date, Nightshade Nostrum is one of the most useful damages to the Elixers case, so make sure you always have one in your inventory. The Nightshade Nostrum effects last 1 day. VIGOR MORTIS, made using 1 honey and 2 mourning glory, will provide Abigail with a 75% increase in speed. Vigor Mortis lasts 1 day. PIPPOOKS/ BABY GHOSTS (NOT STARVE TOGETHER) One of the most interesting mechanics that has been added to the world of Don't Starve Together is the addition of Pippooks. Pippooks that are essentially baby ghosts who need help finding Trinkets on the map. When interacting with Pippook, which can be done by clicking right on Pippook, Pippook will begin to indicate whether the player is close to the treasure they desire. Pippooks may require you to bring them to a few baubles before they disappear, but all the better since Pippooks are the only way players can get mourning glory. HOW GET MOURNING GLORY DST Each Pippook will have 3-5 Lost Toys that the player should be looking for. Players will receive 1 mourning glory for each of the returned lost toys and will receive 4 mourning glory after the discovery of the last lost toy. HOW PIPPOOK and FIND LOST TOYS Players should pay attention to how Pippook tries to interact with them. When players are close to a lost toy, Pippook will start signaling with rings over your head. The bigger the ring, the closer the player is to the lost toy. If players are too far away from Lost Toys, Pippook will signal the overall location of Lost Toys with their bodies. HELP STUN FOR ABIGAIL As you progress through Don't Starve and Don't Starve Together, you will begin to gain access to weapons and spells that can stun enemies. Using weapons like ice personnel and fire personnel can be extremely helpful in trying to kill more sophisticated mobs like Krampus, Deerlops or elk/goose. Keeping Abigail alive will be important if you want to survive! ABIGAIL can't get POISONED If you play shipwreck and deal with enemies that deal with poison, pop out your Abigail and her tank are largely nullifying the consequences. Abigail is also useful for killing mobs while swimming and Help protect you when water mobs attack you. IS IT WORTH FIGHTING WITHOUT ABIGAIL? A quick answer, not quite. If you're attacking things with a team, be sure to go for it, but often things aren't worth farming if you don't have Abigail around. The real reason is that it takes you an extra hit to kill small mobs, so even if your first kick reduces them to 2HP, they still require a second hit to actually be a KO-D. The goal is to make sure you never bite more than you can chew and keep Abigail alive as much as possible. DOES WENDY DEBAFF'S DAMAGE AFFECT INDIRECT DAMAGE? Not if Wendy's damage from weapons like Fire Darth, Fire Darth will still cause default damage over time. WHAT IS THE BEST WEAPON FOR WENDY? Don't Starve: Ham Bat (1 Pig Skin, 2 twigs, and 2 Meat) or Darth Don't Starve Together: Ham Bat (1 Pig Skin, 2 Branches, and 2 Meats) or Dart Shipwreck: Obsidian Spear (1 Spear, 3 Obsidian, and 1 Dragon Heart) WHAT CHARACTERS WELL PAIR WITH NOT Wendy is a character who has no obvious pairing, although there are several strategies players may want to familiarize themselves with to make their Wendy's experience smooth. The first character I thought about when it came to pairing with Wendy is Warily, as he provides players with stat buffs when they eat his special recipes. Military players can help buff Wendy's players so they do more harm, which is on par with the default character. Players can also pair Wendy with Wortox for quick healing or of course another personal favorite of Winona. Winona and Wortox areas are always great characters paired with because they provide more support and damage in all combat situations. Fun pairing with Wendy Willow, as both are considered summoner classes. Use BERNIE! and Abigail together to grind resources and help support each other by making his way through Constant. Abigail may be dead, but Willow can certainly fill her seat. Players can choose a pair of Wendy players with Maxwell, simply because Wendy's players can easily buff Maxwell player Sanity regen so they can permanently turn off Shadow Puppets. Although, it's also a great idea if players also wickerbottom in this pairing as it will give you unlimited food, tentacles, birds and other fun resources. The only character I highly recommend you avoid pairing yourself while playing Wendy Webber. While Webber is a great character to play, Abigail tends to get too noisy around the Spiders Webber players try to make friends. WARNING To date, I believe Wendy to be the easiest character to settle in when you start in Don't Starve and don't starve together. The fact that Wendy's can grind bees, spiders, rabbits and other small mobs make Wendy's very useful for new players. I am a big fan of the new Wendy rework and think it gives more versatility in the style of the game, however, I don't see Wendy staying the same as long as I still think, there are some patches and cisterns that are going to come up in the next few days. So I'm curious, what do you think of Wendy? Is it hard for you to control Abigail? What do you think of her new remodel? Let me know in the comments below! Below! don't starve together wendy guide. don't starve together wendy rework. don't starve together wendy ectoherbology. don't starve together wendy abigail. don't starve together wendy cistern. don't starve together wendy pipspook. don't starve together wendy how to summon abigail
